## Rescue angers Iranian minister

By The Associated Press

Iran's foreign minister, angered by the daring Canadian of six Americans trapped in Tehran, declared Wednesday he expects the U.S. Embassy hostage to suffer for the "most probably" will now be more harshly. Foreign Minister Saadegh Ghotbzadeh and the responsibility will be Canada's.

Ghotbzadeh, at a Tehran news conference, denounced the Canadian operation as a "flagrant violation" of international law and warned that retribution would be exacted the Canadians sooner or later.

At the Moslem militants who have held the embassy and for 88 days refrained from immediately endorsing Ghotbzadeh's threat of tougher conditions for their cap-

tives. Spokesmen said a formal statement might be issued later, but some reports quoted militants as saying they would not treat the hostages any differently. A State Department spokesman said Tuesday such a reprisal would be "irrational."

Iran's domestic political trouble flared into new fighting, meanwhile.

Rebels reaching Tehran said at least 10 persons were killed and 20 others injured Wednesday in clashes between the central regime's revolutionary guards and Kurdish militants in western Iran.

The official Iranian news agency said two army officers held hostage since Monday by unidentified insurgents in the Kurdish town of Salmas were killed.

sharp jump  
oil prices  
hurt U.S.

ASHINGTON (AP) — Another increase in world oil prices could worsen the already gloomy look for the nation's economy this year, Carter and his advisers said Wednesday.

In addition, the president said inflation almost certainly will be worse if we try to recover all of the increase in last year's energy costs through higher wages this year.

The most immediate problem is to ensure that last year's sharp rise in energy prices does not in a few areas of prices to wage increases that would worsen the unending inflation rate for many years to come," Carter said in his annual economic report to Congress.

A report repeated the administration's forecasts of a mild recession in first half of 1980 with unemployment rising to 7 percent. Oil prices, increasing 10.4 percent a year and 8.6 percent in 1981, are expected to rise 7.3 percent last year. "It's bad as they are, those last assume world oil prices will be only slightly more than the rate of inflation or not much more than 7 percent. This seems especially realistic since the Organization of Petroleum Exporting Countries ended their price in the past 12 months.

In addition, Saudi Arabia and other oil producers announced increases in their oil prices of 8 percent just this week. Charles L. Schultze, the chairman of Carter's Council of Economic Advisors, acknowledged to reporters that oil prices rise significantly "that the forecast, "it would be us some trouble."

He also said the administration projects the increase in domestic oil prices at about 20 percent.

Domestic oil prices are rising more than the world price as the result of Carter's program to lift existing controls from domestic prices.

A annual economic report, which prepared by the Council of Economic Advisors, was even more exact about how another major increase in oil prices could affect the economy in 1980.

As in 1979, a major threat to the economy is that OPEC decisions about oil production may lead to increases in world oil prices that go well beyond those announced recently," it

such a development would, in the long run, add to the restraint on the economy exerted by oil prices, exacerbating

legislature urges  
no female draft

ALT LAKE CITY (AP) — The House of Representatives voted overwhelming this morning to urge Congress not to draft women. The House's four women members voted against the resolution.

Supporters said the measure, which would have prohibited "our mothers and our daughters" from "the arduous tasks of the armed forces."

Meanwhile, Republicans killed a proposed constitutional amendment that would have put a lid on the government's share of a taxpayer's check.

Two women representatives spoke against the draft resolution, including Beverly White, D-Tooele, who is a mother. "I don't love my daughters more than my sons," she said.

Genevieve Atwood, R-Salt Lake, said she felt as a 33-year-old woman she has as much responsibility to the country as a 33-year-old man.

The resolution was sponsored by Ray Free, R-Salt Lake, a retired general. "We in Utah have taken a stand on the ERA," he

'Danger,' tax forms!

A "danger" sign in Provo's Federal Building is referring to nearby construction, not the federal tax forms. Taxpayers will be in danger, however, if taxes are not paid.

bate inflation and lead to lower economic growth and higher unemployment," it added.

The report said the increase in OPEC oil prices last year was equivalent to a tax increase on Americans of \$53 billion. It said the shock of the increase didn't create a recession because the economy showed surprising strength, especially in consumer spending.

Rep. T. Quentin Cannon, R-Salt Lake, said, "When we have to have our mothers and our daughters, I don't want ladies drafted for menial tasks in the armed forces."

Meanwhile, Republicans killed a proposed constitutional amendment that would have put a lid on the government's share of a taxpayer's check.

The official Iranian news agency said two army officers held hostage since Monday by unidentified insurgents in the Kurdish town of Salmas were killed.

Tuesday morning in the West, was not reported to the general public in Tehran until midday Wednesday, when newspapers gave it front-page treatment.

The half-dozen Americans had avoided capture when the U.S. Embassy was seized Nov. 4 by the militants, who still demand return of the deposed Shah Mohammad Reza Pahlavi in exchange for their prisoners' freedom.

The six stayed at Canadian diplomatic residences until they were spirited out of the country late last week or early this week under cover of false Canadian passports and forged visas. The Canadians closed down their embassy in Tehran Wednesday were reliably reported by Western journalists in the Iranian capital.

The escape of the six American diplomats, disclosed

## Utah storm clobbers West, Midwest too

AP — A winter storm that left Southern California mired in mud and some Western states buried under knee-deep snow pushed into the nation's midsection Wednesday, Wednesday, sending blizzards to Dixie.

Hundreds of schools closed, lights went out and cars slammed together as the storm that produced Utah's heaviest snowfall in six years pushed into Kansas, Nebraska, Oklahoma,

**See local weather story**  
page 3

Arkansas, Missouri, Illinois, Tennessee and northern Alabama.

A hitchhiker who caught a ride on a truck in northwestern Missouri became the 13th person to die in weather-related accidents in two days when the truck crashed into another truck. The state trooper told police he was blinded by the snow.

In Southern California, where five people died in earlier rainstorms, mud was 10 feet deep on one street in San Bernardino and overflow from a dam in neighboring Tijuana, Mexico, flooded parts of San Diego, drowning 15 horses. A mudslide in the Los Angeles suburb of Malibu blocked the northbound lanes of the Pacific Coast Highway.

The storm, in its march to the east, dumped 10 inches of snow in Salt Lake City, above Colorado up to 20 inches of new snow and smothered Flagstaff, Ariz., under 25 inches. Four inches of rain in the mountains threatened to produce serious flooding in the normally dry Salt River bed in Phoenix, Ariz.

About 1,540 residents of Eufaula, Okla., had to brave a night without heat in sub-freezing weather when a gas line was ruptured by a dynamite blast just north of town. Fifteen large aircraft heaters were trucked in from

Tinker Air Force Base to provide heat for four school homes and the Eufaula hospital.

Dave McGuire, 33, had a typical story. When he set out to make his daily delivery in Oklahoma City, he slid into the car of two neighbors and broke a taillight. Later, he slid into a guard rail of an expressway and scraped the chrome off. Then, blocked by a collision up ahead, he turned off an exit ramp.

"The ramp was like glass and I slid all the way down the ramp into the back of a car some joker had left there overnight," he said. After leaving a

note on the car, McGuire started up an icy hill.

"There was no traction and I started sliding backward," McGuire said. "That's when this truck coming up the hill rammed me from behind."

While McGuire was waiting for another, another car spun out of control and demolished the front end of his car.

In western and middle Tennessee, a coating of snow, sleet and ice caused numerous traffic accidents and closed schools in Memphis, Nashville, Knoxville and Jackson.

## U.S. not seeking to get games here

WASHINGTON (AP) — The Carter administration wants to make sure American athletes can show their skills but does not want the United States to be seen as an alternative to the Moscow Olympic Games, a congressional panel was told Wednesday.

Nelson Ledsky, deputy assistant secretary of state for congressional relations, said, "We want our athletes to be able to compete. They have worked very hard, often for years, to perfect their skills."

He also said the administration is determined that the Soviet Union must withdraw its military forces from Afghanistan or face a refusal by the United States to take part in the competition.

"We must convince the Soviets that they will pay a price for their aggression, whether in Afghanistan or elsewhere," said Ledsky, a member of the administration's ad hoc task force on the Olympics.

"The United States would favor

organizing some form of alternate games in the fall or summer of 1980," he said.

"We will join as appropriate in working with other governments to organize such alternative games," Ledsky said, adding:

"Our preference is that such games not be held in the United States ... At the same time, the United States would be ready, if necessary to host such games."

Ledsky told the House transportation and commerce committee he could not say exactly how much it would cost to hold alternative competition.

"It is too early to answer this question," he said. "Much would depend on where the games would be located, how many nations would agree to participate, and what contributions we might be able to obtain from others."

Ledsky suggested the competition could be held at one or more sites overseas, perhaps in some Third World country.

## Snow measure now faster

By MICHAEL MANGUM  
University Staff Writer

Skiers crave it, warm-weather buffs detest it, and many simply tolerate it. But regardless of how popular or despised the stuff is, the winter's snow nonetheless becomes the lifeblood of most western communities each summer.

Mountain snowpack accumulated during the winter months accounts for more than 70 percent of the western water supply during the year. This is especially true in Utah where precipitation averages only 12 inches annually as compared to 120 inches in parts of the northwest.

Because the runoff from Utah's mountain snowpack is so vital to life in this arid state, officials at the U.S. Department of Agriculture's Soil Conservation Service (SCS) have in the past gone to great pains to acquire accurate measurements of snow water content, even in extremely remote mountain regions.

But now, thanks to modern technology, the acquisition of snowfall data is fast becoming a much easier task.

Through the use of an innovative radio transmission system, signals sent from a mountain transceiver site are "bounced" off the trails of distant, remote sites in the earth's upper atmosphere and are received at SCS offices in 10 western states.

Called SNOTEL, short for "snow telemetry," this new system revolutionizes previous methods for obtaining data from many of the 160 remote mountain sites where snowfall measurements are taken.

"Most of these sites are reached by snowmobile or helicopter," said Bob Whaley, snow survey supervisor. He said 48 of the sites have been set up under the SNOTEL system.

Whaley indicated that 15 more SNOTEL sites in Utah should be established by the end of summer.

"With SNOTEL, no longer is it necessary to spend a good part of the day snowmobiling or flying into an area to obtain snowfall data," Whaley said. "Instead, all we do is press a button and we receive a detailed readout of the information we need."

See SNOTEL page 2

Before SNOTEL, snow surveyors traveled by helicopters, snowmobiles, skis or snowshoes to reach measurement sites.

## Carter calls for housing assistance

WASHINGTON — President Carter's election-year urban budget calls for increased housing assistance for the poor while imposing austerity on local governments whose federal aid will feel the harsh bite of inflation.

Housing experts say the boost in housing funds won't make up for past cutbacks in Carter budget. Even so, they believe it will be tough to win congressional approval of the 1981 budget.

This paradox typifies the president's 1981 budget, a spending plan that treats a delicate line between politics, fiscal austerity, defense increases and efforts to improve the face of urban America.

"The bottom line is this: We'd like more, but we'll take what we can get," says a congressional housing expert, who asked not to be named.

The budget's main urban goal is to help poor and moderate-income families find decent housing.

The president is asking Congress to subsidize an additional 300,000 housing units in fiscal 1981, which begins Oct. 1. That's an increase of 25 percent above this year's 240,392 units.

## Carter clarifies new doctrine

WASHINGTON — President Carter says he sees no outside threat to the Caribbean area and therefore will not promise to use military force to defend it.

Carter thus declined to place the neighboring Caribbean in the same "vital interest" category as the Persian Gulf. He also asserted that the United States would not be able, now or in the future, to defend the Persian Gulf area by itself.

The president made the statements Tuesdays in a question and answer session with visiting editors and broadcasters. The White House released a transcript of the session Wednesday.

## ERA withdraws from Missouri

JEFFERSON CITY, Mo. (AP) — The sponsor of the federal Equal Rights Amendment withdrew the proposal from consideration in the state Senate on Wednesday, saying she considers the measure dead for the year in Missouri.

Sen. Karen Giles, D-St. Louis, said she acted after deciding she "did not have the votes" to win ratification of the constitutional amendment to ban discrimination based on sex.

The vote had been postponed several times. The amendment needed 18 votes to win approval in the 34-member Senate.

# Snotel

continued from page 1

At each SNOTEL site is an inch-thick steel "pillow" or pressure plate which converts the weight of snow resting on it into an electrical reading of the snow's water content. This reading is transmitted through radio links to the Snotel stations at Bozeman and Ogden.

The collection station near Ogden gathers information from the SNOTEL sites in Utah. From there the data is sent to a central water supply forecasting station in Portland, Ore., but a readout is also immediately released to an SCS computer terminal in Salt Lake City, Ogden said.

"We receive two data readings daily, one at 6 a.m. and one at 2 p.m.," Whaley said. He added that the data can be updated every 15 minutes if necessary.

Clarke Garn, a range conservation technician for the SCS in Provo, said, "On a snowmobile it's used to take me a full day to get snow water content reading in the forest or foraging on the mountains surrounding Utah Valley."

"With helicopters, 15 or 16 readings can easily be obtained in one day. But now with SNOTEL, 48 readings are obtained in a matter of seconds."

Whaley estimated that SNOTEL will ultimately cost \$5 million in federal funds when all the snow measurement sites are installed with the system. However, despite the cost, he feels that SNOTEL will still be less expensive in the long run.

"Not only is SNOTEL's cost per reading less than other methods, but its efficiency cannot be matched," Whaley said.

## The Daily Universe

The Daily Universe is an official publication of Brigham Young University and is published as a cooperative enterprise of students and faculty. It is produced as a laboratory newspaper in the Department of Communication. The Daily Universe is the sole Editor and Managing Director with the counsel of a University-wide University Advisory Committee.

The Daily Universe is published Monday through Friday during the fall and winter semesters except during vacation and examination periods. The Universe is published Tuesdays and Thursdays during the spring and summer semesters.

Opinions expressed in The Daily Universe do not necessarily reflect the views of the student body, faculty, university administration, or the members of the Church of Jesus Christ of Latter-day Saints.

## Refiners 'massively overcharge'

WASHINGTON — The typical family using home heating oil will pay about \$130 extra this winter because of unjustified price increases by oil refiners, a new congressional study showed Wednesday.

The total overcharges, including both home heating oil and diesel fuel, total more than \$3 billion, according to the study by the technical staff of the House Government Operations subcommittee on commerce.

Rep. Benjamin Rosenthal, D-N.Y., the subcommittee chairman, said the study "provides confirmation that U.S. oil refiners are indeed guilty of massive overcharges."

He blamed the overcharges on "profit-hunting" refiners and lax governmental enforcement of the price standards for refined petroleum products.

The study made new calls for price controls to be reimposed on home heating oil. Controls were lifted in 1976.

The study showed that domestic oil refiners' profits increased by more than 800 percent from September 1978 to September 1979. Profits on diesel fuel increased by more than 700 percent during the same period, the study said.

## Brown studying Weteye issue

SALT LAKE CITY — Defense Secretary Harold Brown now is expected to announce in March whether to go ahead with transferring Weteye nerve gas bombs from Colorado to Utah, a spokesman for Utah's governor says.

If Brown follows the likely military recommendation, that decision would be to move the bombs, probably this summer, said Maggie Wilde, news secretary to Gov. Scott M. Matheson, who is attempting to prevent the move.

Matheson, a member of the state's congressional delegation, has proposed the move, contending it endangers the safety of residents of the two states, and want the bombs destroyed — detoxified in the military lexicon — where they are.

Harold Brown, director of the Mountain Arsenal near Denver once was slated for destruction there, but it was decided they were necessary for national security. It was decided in 1976 to move them to the Tooele Army Depot in Utah's western desert because the Rocky Mountain Arsenal was too close to the Denver airport.

The governors of the two states, and some members of the state's congressional delegation have proposed the move, contending it endangers the safety of residents of the two states, and want the bombs destroyed — detoxified in the military lexicon — where they are.

## Majority assumes women to be drafted, poll shows

WASHINGTON (AP) — A majority of Americans believe that women will be drafted to serve in combat if the Equal Rights Amendment is added to the Constitution, a new survey finds.

A similar majority believes employers will not discriminate if the amendment is passed but rejects the notion that men will be denied jobs in favor of women and that separate toilets for men and women will not be allowed.

Whaley said the system is not limited to these functions. "In the future we hope to use it for measuring and transmitting data on snowmelt, soil moisture and temperature, air quality and even air humidity."

Whaley added that measurements of air humidity would be helpful in determining future fire danger during the summer months.

Commenting on current snowpack conditions, Whaley indicated that as of Jan. 1, snow water content in Utah's mountains was extremely low but added that since then, water content has increased to above normal in most areas.

"For example, at the Timpanogos Divide in American Fork Canyon, snow water content was only 28 percent of normal on Jan. 1," he said, "but as of Jan. 25, due to a couple of heavy storms, it greatly increased to 103 percent."

## Writer sells 'Mormon satire'

By MICHAEL MANGUM  
Universe Staff Writer

though some may disagree with the content of writing, Mike Agrelius feels he has provided Mormons with a much needed, humorous view of themselves. A 1978 BYU graduate in advertising, has written two books satirizing prominent Mormons, and created a game, "Count Your Blessings," which is becoming increasingly popular among Mormons and non-Mormons.

Agrelius' first attempt at "Mormon humor" was a book known as the "M-Discussion," a satire of missionary discussions presented as a guide to returned missionaries find a wife.

wrote the "M-Discussion" while in my mission," Agrelius said. "I wanted to help missionaries who were deeply learning their discussions."

The "M-Discussion" first appeared on the local scene in December 1978, and within six days all the 75-cent copies were sold.

was surprised the "M-Discussion" sold so well," he said, "but I was pleased to discover that ideas were marketable."

on thereafter Agrelius began work on his game, "Count Your Blessings," which was first sold in local stores last September. The game took six months to design and cost \$10.

one of my main purposes in creating the game was to provide a substitute for poor quality church-ed games," said Agrelius. "I also designed it to teach gospel principles."

added that many non-LDS people have told them they like the idea of the game.

Utah valley alone, more than 5,000 copies of the game have been sold.

erry Richards, general manager of a local department store, said "Count Your Blessings" sales kept with those of "Monopoly," the top-selling game in the store.

Agrelius' latest effort is the book, "Especially For One," a parody on the well-known book series "For Mormons."

the book, set for commercial distribution on Feb. 15, contains contributions from Pat Bagley and Steve Brown, former cartoonists for the Daily Universe.

Agrelius is now a staff artist for the Salt Lake Tribune.

Police hold suspects  
Provo-Orem thefts

rovo Police presently have two individuals in custody, two believed to be connected with a recent series of home burglaries in the Provo-Orem area.

uesday evening a juvenile from Provo was arrested for shoplifting.

the time of the arrest, the individual was wearing a unique piece of jewelry which was recognized as an item reported stolen in a home burglary.

The Provo Police obtained a search warrant Wednesday and searched from the home the juvenile, several items reported stolen including a television set, a cassette recorder, some coins and at least 30 pieces of jewelry.

In a separate incident Wednesday morning, Police Detectives Dennis Lee and Peter Hansen, arrested the driver of a truck matching the description of a vehicle involved in another home burglary.

Police don't know the

Bruce Call, a junior in political science from West Chester, Penn., also contributed to the book.

"The idea for this book came from my dislike for 'Especially for Mormons,'" said Agrelius.

Referring to the way in which people simply read taken directly from the book, Agrelius said, "Too many church members rely on this book instead of reflecting upon and sharing their own spiritual experiences."

In a letter to Agrelius, Deseret Book Company called the book "rude and distasteful." In another letter, however, one LDS general authority personally approved of "Especially For Anyone," calling it his "kind of writing."

Agrelius said he feels there is a necessary place for the book in some places. "Because we are a peculiar people, we need to learn to laugh at some of those peculiarities," he said.

Agrelius added that Mormons often find themselves seeking entertainment from popular comedians and must "phase out" many vulgarities.

"We shouldn't have to look to worldly things to have fun," he said.

### Woman rescued from flames

OGDEN, Utah (AP) — Mrs. Rex Brunker, 52, was rescued Wednesday from her burning house by an electrical worker who forced his way through the flames to bring her to safety. She is in critical condition at St. Benedict's.

Grant R. Larson of North Ogden was driving by when he saw smoke coming from the house. He stopped and looked in the front window just as the curtains caught fire.

Larson opened the blocked front door three or four inches with his body, and then determined to be involved with the two men already in custody.

mined there was movement and a sound inside.

Larson said he saw Mrs. Brunker on the floor, her face burned and hair singed.

"I went back and pulled her to the door, but couldn't get it open wide enough. I hit the door real hard and got her part way out; then I got her outside," he said.

Battalion Chief Lawrence Todd said the fire was caused by a fireplace cinder that landed on the living room

floor. He estimated the loss at \$20,000 including \$10,000 for contents.

## Weather conditions stable; storm heads for Wyoming

By KAREN HANSEN  
Universe Staff Writer

Utah Valley's worst storm in three years came to an end Wednesday even though overcast skies threatened more snow.

Weather forecasts show conditions are stabilizing.

The storm, which began Sunday, dropped nearly 15 inches of snow, forcing early closing of businesses and schools. Travelers were advised to take a slower route in their chains in their cars.

By Wednesday afternoon, however, things looked much better. Curt Bulloch, weather observer at the Provo Airport, said there was no measurable precipitation since Tuesday night, and the barometer was rising, indicating stable weather conditions.

Bulloch said the snow was deeper in some places because of "quite a bit of wind" which created drifts.

Lt. Bud Catlin of the Utah Highway Patrol reported no problems on any of the highways in the area, and did not for-

see any if the weather remained good.

He said there had been no major accidents within the last three days. "There were only sliders in the dividers," he said.

Sgt. Gary Miner, Provo Police traffic specialist, attributed the lack of accidents to the depth of the snow. "It scared people and slowed them down," he said.

Classes at BYU began Wednesday morning as scheduled, although Tuesday's night classes were cancelled and many faculty and staff were given the OK to leave early because of the storm.

The forecast for Thursday through Saturday calls for moderating temperatures ranging from 25 to 30 degrees during the day. Light winds, morning and evening fog and variable clouds are expected for all three days.

The storm was caused by a low pressure area

which settled over Utah. It came from the south and headed north through Wyoming.

Although the storm was the worst in several years, it brought good news for the skiers.

### SPERRY UNIVAC OFFERS MORE TO THE NEW GRAD WHO HAS MORE TO OFFER.

Since developing the world's first commercial computer, our emphasis has been on good products, sound management and innovative brainpower.

If you're graduating this year and have a strong desire to establish your career with a computer industry leader, consider the virtually unlimited growth at Sperry Univac in Salt Lake City.

**QUALIFIED?** We're looking for:

**PROGRAMMERS:** Candidates with bachelor's or master's degree in Computer Science or Data Processing or, bachelor's degree in Electronic Technology, Math, Physics and some programming experience or interest.

**ENGINEERS:** Graduates in the Electronics or Industrial, Electrical, electronic, or computer engineering

**INTERESTED?** Establish your career with a leader in the development of computer systems and technology.

• We'll provide the challenge of meeting these needs today and in the future.

• We'll provide an excellent benefits package including tuition reimbursement.

Our representatives will be on campus Friday, February 1, to discuss your career interests and opportunities. Contact the Career Placement Office NOW to schedule your personal interview.

If unable to interview, please send resume with complete copy of transcript to:

Scrub suits have become popular in such places as discos and athletic fields, far from their native hospitals.

### Hospital 'greens'

## Stolen 'scrub suits' sighted

By KEVIN ALLAN

University Staff Writer

Hawkeye and Trapper John, look out. Scrub suits now look "in."

Scrub suits, also known as "hospital greens," have become so popular in recent months that the Utah Hospital Association has issued a public appeal aimed at combating theft of the clothing from area hospitals.

"During the past year our hospitals have spent over \$100,000 to replace stolen scrub suits," said Donald B. Kinnerley, UHA executive vice president.

Where have all the scrub suits gone?

"Scrub suits have become a popular item for young people as a warm-up type suit," the UHA release said. "In particular, high school athletic teams have been totally outfitted in scrub suits."

"Sales have tapered off lately," said Suzanne Jones, a saleswoman in one Salt Lake Wolfe's store. "We've had them on sale about a year. They're not as popular as they used to be."

The UHA does not seem to think so. "One out of Salt Lake City's 100 hospitals spent over \$100,000 in one month to replace missing scrub suits this Fall," said the UHA release.

Wallace Ecklin, director of environmental services at Utah Valley Hospital, expresses doubt at the figures in the UHA release. "If I had \$25,000 worth stolen, I wouldn't have any left." In addition Ecklin explained that it is difficult to determine how many are stolen and how many are lost.

Mark Howard, an administrator at American Fork Hospital, said his institution is replacing more suits than it should also.

### U.S. Postal Service to issue new stamps

The U.S. Postal Service announced the details for a three-part set of postage stamps to be issued on Feb. 25 during National Letter Writing Week.

First day of issue ceremonies will be held at the Library of Congress. The regular issue stamps focusing on the importance of letter writing will be printed in two different sizes, each pair being made up of one large and one small stamp.

The stamps were designed according to a concept developed by the U.S. Postal Service Graphics and Design Division, with Randall McDougal executing the finished work.

### Veterans' benefits may increase

The U.S. Senate will soon consider an amendment to a bill which would increase veterans' benefits, according to Bob White, veterans' employment counselor at Utah Job Service in Ogden.

"Amendment S-870 to the GI Bill Amendments Act of 1979, will increase veterans' education benefits by 15 percent," White said.

Sen. Alan Cranston (D-Calif.), sponsor of the amendment, encourages all veterans to write him to show their support of the measure. Letters to Cranston

should be addressed: Chairman, Senate Veterans' Affairs Com-

mittee, Senate Office Building, Washington D.C. 20510.

## Independent Study offers degrees

By KIM KAATMAN  
University Staff Writer

Perris Jensen, a 70-year-old freshman at BYU, is living proof that it's never too late to get an education.

As a student in BYU's Degrees by Independent Study program, Jensen is getting his first formal degree after practicing law in Salt Lake City for 40 years.

Degrees by Independent Study (DIS) is a program set up to provide people already involved in their professions and lifestyles with an opportunity to receive an accredited general education degree.

By definition, DIS is a correspondence-degree program. Students do the majority of their work at home, at their own speed. They receive instruction from BYU professors through tapes and letters, and attend seminars on the BYU campus twice a year.

A high school dropout, Jensen received his J.D. from a correspondence course offered by LaSalle University. And since the state of Utah did not require a university degree prior to any legal study, he passed his bar exams and practiced law in Salt Lake City.

Jensen, BYU's oldest freshman, began his DIS program in December 1979. "I'm getting this degree to test myself to see if I still have the ability to learn, and retain knowledge," he said. "The Book of Mormon teaches us that learning is an eternal principle, so I guess I'm storing up for the hereafter."

Jensen is joined by 361 other DIS students currently enrolled in BYU's program. Students from all states and several foreign countries are obtaining recognized, accredited degrees while they work and raise their families. The professor of English at BYU is one of the four DIS instructors. "The two DIS seminars I conduct are the highlights of my year. I virtually live for them. The quality of students in the DIS program is exceptional," he said.

"These people come here with a passion for learning. They are mature, interesting in-

dividuals, and this is the first time many of these students have been exposed to purely academic materials," he said.

"Typically they have been intimidated by

academic people and through this program they realize they too can make significant contributions," he said.

Interested persons may contact BYU Department of Degree by Independent Study, Division of Continuing Education, 172 FB, for registration information.

## Artist uses lightbulbs, motors

By PHIL BUSSEY  
University Staff Writer

While most artists cover their canvas with oil paint and watercolors, one BYU art professor creates his art using plexiglass and solid state circuitry. Peter L. Myer, creator of the art form which he calls "Kinetic Light Sculpture," incorporates his knowledge of art with electronics and engineering to construct his sculptures.

"The art is not newly discovered," explains Myer, "but stems from a type of art called 'luminism.' 'Luminism' utilizes such materials as metal, plastic, wood, plexiglass and glass, in combination with lights and motion to create images or movement."

Myer, who received his bachelor's degree in art at BYU and his masters at the University of Utah, became interested in "luminism" while he was chairman of the art department at the University of Nevada, Las Vegas.

"I guess it was natural for me to become interested in lights with all the casinos," Myer said.

Having a brother who is a scientist and another an engineer, Myer says he had a good background to try luminism. His first creation utilized four 18-inch rotating discs with motors to control speed and direction. Polaroid filters were used with cellophane and scotch tape in between to create colors and shapes. Most of Myer's first works resembled that method.

But for Myer, problems developed when mechanical malfunctions arose in some of his sculptures. "Because of my background in electronics and engineering, I decided to experiment with solid state circuits instead of moving motors," he explained. "I found the solid state circuit gave the illusion of light more movement and created a better two-dimensional presentation."

Myer said his experiences with glass sculpting began two years ago when he met Rulon Dahl, a professional glass blower in Salt Lake City.

"I tried glass because others materials I used gave the sculptures a 'plastic' or superficial look," he said. "But when I used glass, I could create a three-dimensional image instead of the usual two-dimensional."

Some of Myer's latest light sculptures have incorporated the use of laser, light-emitting diodes, plexiglass and electroluminescent gas. "I have only used laser once so far," said Myer, "as it is a new medium. But with some refinement, its uses can be very exciting."

When asked how he went about creating one of his sculptures, Myer said, "I usually have a sketch and where the idea is developed. Then I put a rough drawing of my idea on paper." He continued, "If I decide to go ahead, I make an engineering drawing, complete with specs and the equipment needed for the sculpture."

"Then after the drawing is completed and the materials purchased, I begin the creation process."

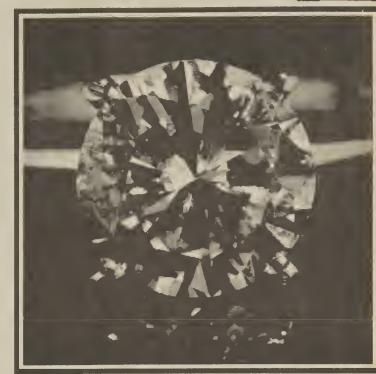

Myer said he tries to bring ideas together with materials in an effort to create an expression. "There exists a challenge to create something new instead of a variation of what has already been done," he said.

The basics of Myer's light sculptures come from luminism, but he says he is always "reaching for new boundaries." In his art he hopes that he will be able to create sculptures that stretch the boundaries of luminism.

Myer will bring his one man show to the Secured Gallery in the HFAC, Feb. 18-29, to give students and public the opportunity to see this new dimension of art and creativity.

Sculptor Peter Myer assembles one of his latest "kinetic light sculptures." The BYU art professor combines his artistic ability with his knowledge of engineering and electronics to construct his sculptures.

## Diamonds

## 'Kramer' earns Globe awards

HOLLYWOOD (AP) — "Kramer vs. Kramer," adding to its already growing list of prizes, has captured four major Golden Globe awards from the Hollywood Foreign Press Association.

The movie, about a New York City couple's battle for custody of their young son, won best dramatic film of 1979, best dramatic actor award for Dustin Hoffman, best supporting actress for Meryl Streep and best screenplay award for Robert Benton during the association's 37th annual awards ceremony last Saturday night.

Best new actress and actor honors went to Bette Midler, who made her screen debut as the neurotic pop music star of "The Rose" and Ricky Schroeder of "The Champ."

Sally Field's portrayal of a Southern millworker and union organizer in "Norma Rae" earned her a Golden Globe as best film drama actress.

In the comedy-musical categories, best film went to "Breaking Away," a low-budget production about a high school graduate enamored with cycling. Peter

Sellers picked up a best actor Golden Globe for his role in "Being There."

Francis Coppola won as best director for "Apocalypse Now," and he and his father, Carmine, shared the award for original score for the Vietnam epic.

"Alice" won awards for Linda Lavin as best actress in a television musical-comedy and Polly Holliday as supporting TV actress. Vic Tayback shared best TV supporting actor honors with Danny DeVito of "Taxi."

MARCEL MARCEAU ... pantomimist.

### Mime to be featured

Universally acclaimed pantomimist Marcel Marceau, in America for a series of appearances at leading theaters and universities, will make a rare appearance at the Capitol Theater in Salt Lake City March 21 at 8 p.m. Tickets for the Salt Lake City appearance are now available at the Salt Palace Box Office and all ZCMI stores. Call 363-7681 for information.

### Art history contest open to students

first prize of \$150 will be awarded to the student who submits the best history paper to the BYU Art History Association this year. The association is sponsoring the Fourth Annual Symposium on History of Art, March 20, in conjunction with the 12th Annual Mormon Festival of Art and History at the Art History Park. Deadline for the submission of papers is March 1.

Any full-time student, undergraduate or graduate, may submit a paper, explains Mrs. Raish, faculty adviser for the association. You must be a member of the Art History Association to be eligible for an award.

In addition to the \$150 first prize, there will be a \$100 second prize, \$75 for third place and three honorable mentions of \$25 each. The entries will also be submitted to theentury 20th student entry for publication.

Any subject acceptable as long as it deals with the history of art in its broad definition, Raish said. Students from fields other than art history are encouraged to submit papers.

## Y plans Miner burial

By BOB FREEZE  
Universe Sports Writer

The BYU Cougars returned to Provo with the road sweep they needed last week to keep them the undisputed leaders in WAC play by defeating conference rivals San Diego State and the University of Hawaii. However, the four day sojourn was not without its ups and downs.

In an ironic twist of events, the Cougars experienced both their highest and lowest point totals in modern BYU basketball history in a 75-hour interval.

While SDSU chose to play the fast-moving style of basketball the Cougars are famous for, the Rainbows employed a Wyoming strategy of slow-down basketball that kept the Cougars score to a meager 34 points.

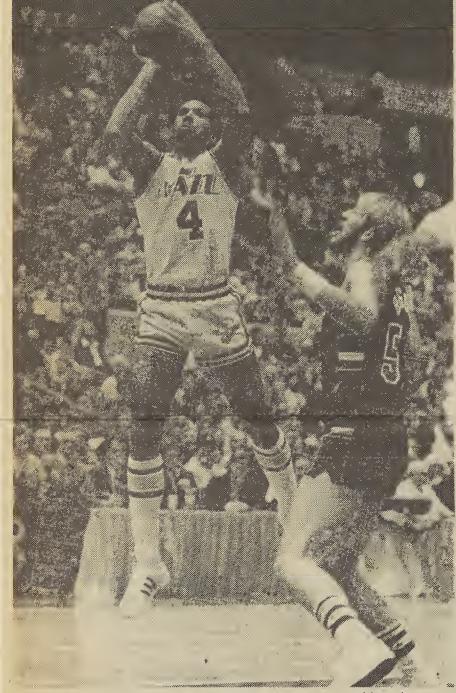

Tonight, the Cougars return to the Marriott Center to face conference rival Texas El-Paso, and while it's anyone's guess as to what will happen, one thing is certain: The Miners have more than their share of incentive to upset the nationally ranked Cougars.

The distinction of beating a team that is rated 18th and 19th in the UPI and AP polls would be enough to tip up any team, and the Cougars have a couple of other reasons to pick with the Cougars.

First of all, a defeat by BYU, which has a 5-2 WAC record and is tied with Utah in league standings, would thrust the 13-5 Miners into first place contention in conference play.

However, UTEP's biggest incentive of all may be the painful memory of the narrow defeat they suffered at the hands of the Cougars a short four weeks ago.

It should be remembered that in that game, the

Utah's Adrian Dantley fires home two of his 18 points in route to a 102-101 Utah win over the N.J. Nets. Dantley will start for the West all-star team in Sunday's NBA classic.

## U.S. Olympic officials seeking possible new sites for Games

WASHINGTON (AP) — With the strong possibility that the United States will not participate in the Olympic Games in Moscow this summer, officials are seeking an alternate site for sports competition among Americans.

And there appears to be plenty of bidders, with the New York-New Jersey-Connecticut metropolitan area the latest.

The United States Olympic Committee, supporting President Carter in his efforts to seek a relocation, postponement or cancellation of the Games in Moscow, has deferred any vote on whether to send a team to Russia until after action by the International Olympic Committee.

However, the USOC executive board directed its staff to "continue to select and prepare" a U.S. Olympic team whether or not the Americans compete this summer, in order to recognize the athletes who have been training as Olympians.

USOC officials said Olympic trials in 17 sports would be conducted between March and June.

The executive board

also told its staff to consider staging its own sports festival some time this year, either among Americans or with foreign athletes who share the U.S. view and decide not to participate in the Moscow Games.

F. Don Miller, USOC executive director, said he believed a sports festival of American athletes would be feasible at the same time the Moscow Games were staged, in Colorado Springs, Colo., using the facilities of the U.S. Olympic and an Olympic Training Center, was the site of a national sports festival in 1978 and 1979.

John B. Kelly, Jr., USOC first vice president, suggested that his home city of Philadelphia also would be an excellent site while one source said that the Carter administration's plan on behalf of the president, suggested that Montreal host the 1976 Olympic Games, would make an ideal location.

New Jersey Gov. Brendan Byrne was present at the USOC executive board meeting and commerce committee today to make a pitch on

behalf of the tri-state area of Connecticut, New York and New Jersey, similar to the unsuccessful bid of New York to host the 1984 Games.

Los Angeles, which is scheduled to host the 1984 Games, and Louisiana, which has the Superdome, also have been discussed.

Los Angeles has 19 of the 21 Olympic venues ready, while the Superdome would be the site of the arena events, with the other being staged at two regional sites.

Colorado Springs,

because of its support by the USOC staff and its holding of a sports festival the past two years, appears to be the front runner for the special games should the Americans not participate in Moscow.

"I'm not saying it's impossible to look at other sites," said Baron Pittenger, USOC special events director who was in charge of the two summer festivals. "But understand we're dealing with a short time frame, six or seven months at the most. I'm saying that if we can solve problems that exist, it makes sense to go back on what we have here."

The Colorado sports festival encompassed 26 sports and 2,200 athletes in 1978 and 31 sports and 2,500 athletes in 1979.

Kelly, however, said he believes that a city the size of Philadelphia would be needed to handle the crowds at the competitive games.

In Senate action yesterday, the Senate voted overwhelmingly to urge all Americans, not just athletes, to stay away from the summer Olympics if the Soviets do not remove their troops from Afghanistan.

The Colorado sports festival, which was held in 1978 and 1979, was a success, with 26 sports and 2,200 athletes in 1978 and 31 sports and 2,500 athletes in 1979.

The Colorado sports festival, which was held in 1978 and 1979, was a success, with 26 sports and 2,200 athletes in 1978 and 31 sports and 2,500 athletes in 1979.

# Swimcats down Colorado

By BOB FREEZE  
University Staff Writer

th BYU swim team sent visiting University of Colorado back to the sea on Wednesday.

The men's team splashed Colorado 69-35, while the women's team downed its opponent 76-28. Kris Smith, a 6-4, 205 pound junior who was third in last year's WAC championships, tied his own backstroke record set in Laramie, Wyo., last year at 54.1 seconds, and sparked the Cougar win. Coach Tim Powers said of Smith's performance, "It has been swimming around 56 all year. I've never seen him get out quick, but he thought he was going to die. Tonight, he finally did it and he died. I think you'll see him swimming a lot from now on."

Her strong performances included Mark McGregor's 1:43.02 time in the 200 yard-free, Darcy Lin's 1:47.25 time in the 200 yard-free, and Robson's time of 2:00.32 in the 200 individual medley.

Swimmers, who appeared pleased with the times of all swimmers, said, "McGregor's time in the 200 was his fastest time all year and it's as fast a time as is in the WAC."

As far as Andelin's performance, tonight was our chance to compete in the 200 yard-free, and though he was only fourth, Darcy hadn't broken all year long, so we are quite pleased that he is 1:46," he said.

said McGregor's performance in the 200 individual medley was another bright spot in the lineup.

McGregor's best time this year was called the meet a "fun meet." Said Powers, "I wanted the chance to run the shorter races. It a crowd pleaser."

We needed to be challenged. They killed us in the medley, and we were a little bit worried, but the responded well. McGregor and Nielson came through for us."

**o coaches**  
connected with  
gambling inquiry

**LBUQUERQUE, N.M. (AP)** — The New Mexico attorney general's office says it is investigating the possibility that some members of the Mexican-American community were involved in gambling.

Johnstone said earlier that the NCAA had conducted its own investigation into alleged gambling and point-shaving at New Mexico but had run into a "stone wall" because it lacked subpoena power.

Officially declined to say whether any evidence had been presented to a state grand jury.

A federal grand jury probing possible mail fraud and bribery in connection with participation of New Mexico athletes reconstituted in Albuquerque Monday.

Federal agents announced their investigation after release late last year of a report of corruption in which former New Mexico Coach Norm Ellenberger and a top assistant, Manny Goldstein, discussed paying a junior college official to doctor the transcript of a student.

They are not ruling any games that have been played as far as it is shaving is concerned, he said. The investigation does not even exclude theerton game.

Cal-Fullerton nipped Lobos 90-85 in the San Diego, Ariz., then went to the final of the AA Far West tournament in Albuquerque before losing to Kansas, New Mexico, a 16-point favorite the Cal-Fullerton.

The San Diego Union this past weekend learned that former state basketball coach Tim Verne had been interviewed by FBI and reportedly been asked about possible point-shaving at UNM in a game with Diego State.

The San Diego newspaper quoted Verne as saying he would not even be a good fit at the end of the AA basketball championships March 22-24 in Indianapolis.

Roy Anuszkewicz Jr., head of the state's organized Crime Commission, said he could not comment on the game or grand jury proceedings because he is the prosecutor.

Peter Johnstone, an attorney for the University of New Mexico to prepare the school's defense to alleged AA violations by

The BYU men's and women's swim teams turned in outstanding performances Wednesday night as they routed the University of Colorado 69-35 for the men and 76-28 for the women.

in an equally impressive performance.

Cougar Brigitte Con led the way for BYU by setting a new school record in the 50 yard-free with a time of 24.87. Her time was only .2 second off the national qualifying times. She also came in No. 1 spot in the 100 yard-free with a time of 54.26.

BYU's Yolanda Mendivil also turned in a strong performance in the 100 yard-breast with a time of 108.12.

Assistant Coach Sue Larson said, "The women haven't had a bad meet all year. We certainly have a shot at winning the regional championships this year."

Wednesday's meet featured a high school format,

rather than the college schedule of events in order to provide more sprint experience in preparation for the Utah Invitational this weekend.

Looking to the invitational, Powers picked Utah as the favorite because the team returned most of its people from last year's squad.

He said Utah's team has more depth than BYU, but with the help of New Mexico and Colorado, is confident the Cougars can steal a win at the invitational.

**'Little Red'**  
dedicates  
next bout

PHOENIX, Ariz. (AP) — Featherweight boxing champ Danny Lopez has dedicated his upcoming title bout to Marine Sgt. Jimmy Lopez, one of 50 Americans held since Nov. 4 in the U.S. Embassy in Tehran.

"I'm sure it won't help the hostage situation," said Lopez, who meets No. 1-rated challenger Salvador Sanchez of Mexico here Saturday. "But maybe by some chance they'll get to see the film over there."

The World Boxing Council-sanctioned bout will be televised by CBS, and Lopez said arrangements were being made to ship a film version to Iran.

## TICKET PICK-UP

Thursday, Jan. 31  
Tipoff: 7:30 p.m.  
BYU vs. UTEP

Priority 1: 3 p.m.  
Priority 2: 12 noon

Saturday, Feb. 2  
Tipoff: 1:30 p.m.  
BYU vs. New Mexico

Workers in the ELWC vegetable department make salads. 400 pounds of lettuce alone must be prepared daily to supply the ELWC cafeteria, Cannon and Morris Centers and the MTC.

University photo by Ed Polakoff

## Tons of salad made weekly

By MARC JOHNSON  
University Staff Writer

Two thousand pounds of lettuce, up to 10,000 pounds of potatoes, and more than 200 gallons of salad dressings must be a 10-year supply of food for the apartment right?

Wrong, this is just part of the weekly supply of food the people in the ELWC vegetable preparation department handle weekly.

Daily Monday to Friday they clean, chop and shred 400 pounds of lettuce, and clean, peel, dice and slice up to 2,000 pounds of potatoes, along with grating cheeses and slicing tomatoes, explained Scott Carrasco, student supervisor of the men in the vegetable preparation department.

Up to 200 pounds of chopped lettuce go up to the ELWC cafeteria to be used for 600 tossed salads. Each weekday 400 tossed salads are sold at lunch time and about 200 are sold at dinner.

The rest of the shredded lettuce is used for the combo plates, hamburgers and other foods, said Carrasco.

Besides working on tossed salad, they also make entrée salads, such as potato and macaroni salads, and all other salads, with the exception of the jello salads.

In order to prepare the potato salads for the cafeteria and to fill the other orders for potatoes

which come in, they peel up to 2,000 pounds of potatoes daily. About 20 pounds go to the cafeteria for the potato salads each weekday. The rest of the potatoes usually fill orders for the Cannon Center in Belmont Halls, Morris center in Desert Towers, and the Missionary Training Center, explained Carrasco.

Along with filling these orders, the vegetable preparation department also makes salads for banquets ranging from 47 to 600 people. The biggest banquets they prepare for are the graduation banquets, said Carrasco.

Besides making salads, they also prepare salad dressings, 50 gallons at a time. Some of the ingredients used to make 50 gallons of thousand island dressing are 27 quarts of buttermilk, nine quarts of dry onions and 10 cans of red peppers.

Besides making thousand island dressing, they also make 50 gallons of blue cheese dressing and 50 gallons of ranch style dressing each week, said Carrasco.

To make these foods, the vegetable preparation department work starts at 5 a.m. and goes until 6 p.m., he said.

To be sure there is enough produce each day there is a produce shipment that arrives every other day on Monday, Wednesday and Friday, he said.

## Self defeating behavior defeated by professor

By DANIELLE ARNOTT  
University Staff Writer

Like the discarding of unwanted trash, self defeating behaviors can be eliminated.

"Self defeating behaviors are any recurring thoughts, feelings or actions which prevent an individual from achieving his full potential," says Dr. Jonathan Chamberlain. "Everyone has them."

A psychologist of 13 years, Chamberlain found a modified program of Dr. Milton Cudney of Kalamazoo, Michigan to be highly effective in helping his clients to eliminate negative behaviors. Chamberlain extended his revised program to the public, offering workshops and a home study program.

The workshops are now used in universities throughout the United States, and the home study program also draws participants from across the nation. LDS Social Services also uses the program and it can be used to succeed.

Workshop participants meet one hour a week for eight consecutive weeks, and focus on eliminating one particular self defeating behavior. Principles, and not the actual behaviors are discussed in the workshops, says Chamberlain. "Once learned, these principles can be applied to other behaviors an individual wants to eliminate them."

The seven-step program has a 96-percent success rate, reports Chamberlain, ranging from "a noticeable improvement" to "total elimination of the behavior."

Typical self defeating behaviors, or SDB's as they are referred to, include compulsive eating, feelings of inferiority, depression, fear of failure, temper and anxiety. Over the years Chamberlain has encountered many incongruous SDB's.

The workshop offered to students at BYU includes a religious supplement written by Chamberlain, in addition to the regular manual. "The principles and ideas taught in the program tie in beautifully with the gospel," explains Chamberlain, whose personal philosophy is that one was created to succeed and to happy.

The key to the success of the program is in participants learning how to take control of their thoughts, feelings and actions, he says, and in realizing they are largely responsible for their own happiness.

While the program has been effectively by third-grade-age children and up, Chamberlain said his participants range in age from 18 to 69.

BYU psychologist Jonathan Chamberlain explains how to eliminate self defeating behavior. His program is used throughout the nation.

## African summer projects available

Operation Crossroads Africa, Inc., a non-profit organization focusing on international development and educational exchange, is seeking faculty, professionals and students to participate in eight-week summer team projects in Africa.

Projects will involve: medicine; nursing; community health development; archaeology; architectural photography; sports and recreation; conservation and environmental management; alternative energy development; farming and agricultural development; animal husbandry and veterinarian work; reforestation in the Sahelian Belt; working in game reserves; and tutorial assistance and compensatory education.

Projects are sponsored

jointly by Crossroads and ministries of various African countries, often in conjunction with the United Nations. Each team will consist of about 10 Americans joined by an equal number of African specialists and students. Projects are located in rural communities of Africa.

Medical and health projects will be expanded this year in order to meet one of Africa's most pressing problems. These projects will focus on tropical medicine, disease control, preventive medicine, public health, epidemiology, nutrition, midwifery, and maternal and child health. Many teams will provide clinical, medical and nursing services to rural communities.

During the past 22 years, Crossroads, whose example inspired the creation of Peace Corps,

has sent more than 6,000 volunteers to 34 English, French, Portuguese, and Arabic-speaking African countries to spend their summers assisting rural village communities. This experience provides a brief but intense immersion in traditional and modern African life and pushes individuals to re-examine basic attitudes, standards, and beliefs in relation to people with contrasting values and life-styles.

Both volunteer and leader positions are open. Persons interested in participating in Crossroads' Summer Program must apply immediately. Contact: Crossroads Africa, 1565 N. 200 W., Provo 374-8708

## Married students getting organized

Because married students sometimes have unique problems, the ASBYU President's Office began the Married Student's Association several years ago.

Though this organization has been around for some time, it is just beginning to get organized.

In the future, the association, led by Matt B. Durrant and under the direction of ASBYU President Dave Listler, will plan a series of lectures to be held approximately every six weeks. These lectures will be directed toward married students and some of the problems they confront.

On Feb. 22, Robert F. Bohn, an instructor of Family Economics and Home Management, will speak on marriage and budgeting.

The association will also have literature on hand to distribute to married students. Copies of a talk given by former BYU Professor, George D. Durrant entitled, "Get Ready, Get Set, Grow" will soon be available.

Though the association's purpose is to offer assistance to married students, it is not intended to provide them with counseling services. "If a serious problem arises we refer the student to their bishop or to a professional counselor," said Durrant. "We do provide literature, lectures and assistance in solving less serious problems."

Those who are interested in finding out more about the Married Student's Association can contact Matt Durrant through the ASBYU secretary on the fourth floor of the Wilkinson Center or call 378-5901.

## Cambodian fund finally available

Contrary to popular opinion, ASBYU is trying to help Cambodian refugees. The Finance Office and the Community Service Office of ASBYU are both working on the problem.

The Finance Office oversees the selection of the senior class gift — that \$12,000 everyone's been talking about. Mark Cahoon, chairman of the class gift committee, reports three top proposals have emerged. One is for the money to be used to aid Cambodians. Another is that the block "Y" be equipped with electric lights. A third is that a wall mural of Christ's second coming be painted somewhere on campus.

The plans of Paul McKean, vice president of the Community Services Office, are more definite than those of the Finance Office. His office will sponsor a fund-raising campaign for the Cambodians' benefit. Their goal is \$50,000 by Feb. 23, according to Jeff Rock, director of the campaign.

It is hoped students will donate most of the money. One item already planned is Cosmo's Disco on Feb. 22, the profits going to the Cambodian fund. A tentative idea is that students skip a meal or a vending machine snack and contribute the savings to the fund. A meal for one Cambodian would cost less than an American quarter. The \$50,000 goal represents (after allowing for the cost of working through the proper charities) more than 160,000 meals. In human terms, that would mean food for 1,000 people for more than 50 days.

What the senior class gift money is used for is the decision of the class and the Finance Committee. But how well the Cambodian fund-raising campaign succeeds is the decision of BYU students.

It's brilliantly simple. No one is asking us to submit a proposal or write letters to Congress. We will be asked to put our hands into our pockets and to pull out a couple of dollars.

We should be glad ASBYU is giving us this opportunity. At least here's an issue that doesn't involve any great debate. We either give or we don't. When you see a blind man with a cup and pencils on the street, you don't debate with him on the relative pros and cons of a welfare state. You either give or look away.

## Another record setter

For the second consecutive week, BYU's Tina Gunn has been named National Player of the Week for collegiate women's basketball. We don't seem to hear as much about Tina Gunn as we did about Marc Wilson but not because she isn't breaking records or gaining national recognition.

Miss Gunn leads the nation in scoring, averaging 32.4 points per game. She has an incredible field goal percentage of 60 percent and converts on 77 percent of her free throw attempts.

Last December she broke a scoring record for UCLA's Pauley Pavilion for girls basketball when she scored 45 points in BYU's game against UCLA. Her talents are not limited to offense. Last year she finished third in the nation in rebounding, pulling down an average of 13.8 rebounds per game.

The BYU women are having a good season. They are undefeated in the Marriott Center and are also at home Saturday against New Mexico, immediately following the men's contest. Tina Gunn, along with the entire BYU women's team, deserve our support.

## Election '80 analysis

### Candidate Bush is for real

By David Webb  
University Editorial Writer

George Bush was just one of the many Republican presidential hopefuls when he went into the Jan. 21 caucuses in Iowa. His stunning victory there has given him impressive momentum which will carry him substantially closer to the GOP nomination.

Ronald Reagan was a sportscaster in Iowa in the 1950s. He maintained contacts in the state and had been a traditional favorite with Iowa voters. Early December polls showed Reagan as far ahead of 50 percent of Iowa's GOP voters. George Bush was running a poor third at that time with only 14 percent of the vote.

Reagan did not actively campaign in Iowa, presumably thinking he had an

easy win. Meanwhile, Bush built an impressive organization in Iowa and began an extensive grassroots campaign. By caucus time he had picked up another 12 percent of those polled. Bush has centralized his campaign, former congressman, United Nations ambassador, Republican national chairman and the director of the CIA. He has proven himself almost as conservative as Reagan, yet he has carefully avoided the ultra-conservative label and has established himself as a candidate likely to be acceptable to all wings of Republicanism.

Right now, for the Republicans, George Bush is the candidate on the move. Whether he can keep on that momentum remains to be seen.

### Letters to the editor:

## Readers comment on sports, Osmonds

leading groups, as a recent Universe story pointed out. And they are to be congratulated for their hard work and talent.

But on the other hand, comes the question: Has cheering evolved into an entertainment medium rather than leading yell in the battle of mass psychology and support of the team? During most games, the BYU cheerleaders lead only a handful of yell. In the Wyoming game, maybe just two, one of which was at the very end.

With the closeness of the BYU student body and the spirit in which it supports its teams, the masses are yearning for cheer "leadership" so that student voices can become a part of the victory. The team can do the entertainment. So will the halftime performance by some group.

If the cheerleaders could eliminate most of their time-out tumbling acts and lead cheers, it could lend a definite psychological advantage for the Cougars on their home court.

Name withheld on request

### Couch defended

One of the biggest problems facing women's athletics at BYU is the quality and quantity of the information that you, the students and faculty, have placed before you. Robert Madson's letter of Jan. 24, regarding Coach Leishman, the head basketball coach, and his playing of his bench in the record-setting game against Colorado State is a good example.

**SENATOR KENNEDY, DO YOU FEEL THAT A STRONG RESPONSE IS WARRANTED AGAINST THE SOVIET UNION FOR THEIR INVASION OF AFGHANISTAN?**

**HOWEVER, WE SHOULD NOT DO ANYTHING THAT WOULD ..AH.. PERMANENTLY ANTAGONIZE THE RUSSIANS.**

## Senate aspirant skeptical of MX

### Marketplace

By Dan Berman

Until the case can be made — a case clearly that has not now been made — that the racetrack deployment of the MX missile is genuinely necessary to the country's security, I will strongly oppose the deployment of that massive military system in this state. In considering whether the MX racetrack deployment is a genuine military necessity, I believe there are some fundamental perspectives that must be kept in mind.

First, the impact on the natural and human environmental impact of the MX is not enough. The imposition of the largest public works project in history on the rural communities and valleys of western Utah and eastern Nevada will be extremely adverse no matter how

local concerns. The problem with our MX system is that it assumes

the deployment of the MX and the

political realities are that if that is the

only challenge, the system will be deployed. The question then will be, with local concerns, the problem with our MX system is that it assumes the deployment of the MX and the political realities are that if that is the only challenge, the system will be deployed.

The question of whether the MX system will be deployed, moreover, is one that will be determined in the fall of 1980. Who is the president and the next Congress that will finally make the MX decision.

And if the decision is to proceed, it will, as a practical matter, be impossible to reverse. This country then will be committed to the expenditure of \$50-100 billion to spread the MX system across our state.

Finally, it is politically ingenious to straddle the MX issues as Senator Garn does by saying that the racetrack deployment of the MX system is his first choice. The question is whether he is for or against the deployment that is now proposed. The question is important not merely in assessing Senator Garn's performance in dealing with issues that are critical to this state. But the position of Utah's Congressmen, delegation and particularly its senator is critical to the practicality of whether the MX will be deployed in Utah. If Utah's

senators are not firmly against that deployment it will happen. That is part of the reality, and it is not the time for our politicians to try to muddle on the issue.

I believe the question of whether the racetrack deployment of the MX missile is a genuine military necessity raises three fundamental issues. First, will the giant shell game of attempting to conceal 200 missiles in 4,500 different locations be successful? If it fails, the racetrack deployment is a failure, because our land-based submarine or sub-basing mode of the MX is viewed as a practical and attractive alternative to the deployment of the MX. If it is secure, the technology is in place, it

is believed to be a substantially less expensive deployment and it does not involve the disruption of our communities and natural environment. Nor in a war would it make this state the prime nuclear target on this planet.

Third, does the rationale of the MX system that it is a second-strike capability aimed not at Russia, but at Russian missile silos make sense? Clearly, the United States needs a strong nuclear deterrent. The United States has a strong nuclear deterrent and the continued deployment of the Trident missile and the long-term deployment of the MX missile may be a failure, because our land-based submarine or sub-basing mode of the MX is viewed as a practical and attractive alternative to the deployment of the MX. If it is secure, the technology is in place, it

### 'Me' decade continues

The Seventies were the "me" decade, a time when personal concerns reigned supreme. But is the "me" decade really over? Take for instance the current situation surrounding Russia's all-out belligerent invasion of Afghanistan.

Everybody screamed that the President must do something — anything — to let the Soviets know how much

we, as Americans, disapproved of the invasion. However, nobody wants the action taken against the Soviets to involve them directly.

Farmers howled when President Carter decided to withhold grain shipments to the Soviets. They were not willing to make a sacrifice. Now that Congress has largely supported boycotting the Summer Olympics and particularly its senator is critical to the practicality of whether the MX will be deployed in Utah. If Utah's

senators are not only unwilling to let the Soviets know how and where we stood from the start, so a good positive attitude would and could be maintained throughout the season ahead.

One of the reasons that Gunn and Beene play a little longer than 30 minutes in more games than she has

played more than 30 minutes. In spite

of this, she is the leading scorer in the nation and has been named the National Player of the Week.

of the students. Half of the students are

in their best interests that he discussed

this fully with them. It was important to him that they knew how and where we stood from the start, so a good positive attitude would and could be maintained throughout the season ahead.

One of the reasons that Gunn and Beene play a little longer than 30 minutes in more games than she has

played more than 30 minutes. In spite

of this, she is the leading scorer in the

nation and has been named the

National Player of the Week.

It would seem to me that concerned

students (like Robert Madson)

wonder why the cheerleaders and band

don't support the women's games.

They are supported by the student

funds which come out of the tuition

of the students. Half of the students are
